

Dear valued customer,

## Same great product, new branding

Hempel packaging to replace Jones-Blair from September 17, 2018

In our last chapter towards the integration of Jones-Blair to Hempel we want to inform you of the pending changes in Jones-Blair product branding.

Effective September 17, 2018:

- Hempel brand will replace the Jones-Blair brand
- Product will be packaged in Hempel branded cans
- Products will have new labels (see page 2 for details)
- Jones-Blair.com will be redirected to Hempel.us
- Product Data Sheets (PDS), Safety Data Sheets (SDS), and Application Instructions (AI) will be available under the Hempel brand on the North America website Hempel.us

Inventory will be replaced on a gradual basis. Existing inventory will not be re-packaged with the product brand changes. You may receive a combination of Hempel brand along with Jones-Blair brand of products for some time as current inventory is depleted.

We assure you nothing inside the packaging is changing, and the product is the same trusted product you have always received. This is just a brand change to better align products under the Hempel brand identity. The NEOGARD brand remains unchanged.

A handwritten signature in black ink, appearing to read "GT Bengtson".

**Greg Bengtson**

Vice President, North America

## Existing labels

The content of this package is blended with other components before use. Any mixture of components will have hazards of all components. Read all warning labels for all products used. Follow all precautions.

**643J9 19990**

VOC: Less Than 340 g/L As Applied

**4760-001**  
**ACRYLITHANE™ 2.8**  
**BLACK**

**TWO PART PRODUCT:**  
Add 2 part 1912B (19990) ACRYLITHANE HS Curing Agent to 3 parts ACRYLITHANE 2.8 Basecoat. For use after mixing - 4 Hours. Mix only enough material which can be used in 4 Hours. For use is dependent with an increase of temperature. Curing Agent will react with water, so uncured paint must remain sealed. ALWAYS KNOW LOCAL VOC RESTRICTIONS IN YOUR AREA. APPLY WITHOUT THINNING.
